# Rishabh Sharma

Senior Software Engineer @ Dell Technologies | Master of Technology
Bengaluru, Karnataka, India

## Summary

Graduated with a Master of Technology in Computer Science from Thapar Institute of Engineering & Technology in 2021, with a solid academic foundation in computational science. Currently contributing as a Senior Software Engineer at Dell Technologies, specializing in designing, developing, and optimizing scalable microservices using Golang, ReactJS, and cloud computing technologies.  At Dell Technologies, collaborated with cross-functional teams to enhance system security and efficiency through threat modeling and vulnerability scans with SonarQube, Black Duck, and Checkmarx. Played a key role in developing an auto-onboarding service for Dell private cloud assets and optimizing HTTP client architecture, driving significant performance improvements.

## Experience

### Dell Technologies
6 years 1 month

Senior Software Engineer
April 2026 - Present (4 months)

Software Engineer 2
July 2021 - April 2026 (4 years 10 months)
Bengaluru, Karnataka, India

Tech Stack: Golang, ReactJS, Python, Kafka, PostgreSQL, MongoDB, Kubernetes, Docker, Helm, CI/CD Automation

- Gathered requirements, analyzed alternatives, and designed microservices, creating HLD & LLD documents to ensure robust architecture.
- Optimized Golang HTTP client creation architecture to reuse a single client across the application lifecycle, improving performance and efficiency by 66%.
- Proactively identified and mitigated threats through threat modeling and security scans with SonarQube, Black Duck, and Checkmarx, leading to a 30% reduction in vulnerabilities and enhancing overall security posture.

- Developed an auto-onboarding service to onboard different Dell assets with the Dell private cloud, saving manual effort and reducing onboarding time by over 90%.
- Integrated metrics into microservices, leveraging Prometheus and Grafana for enhanced monitoring, resulting in a 40% improvement in issue detection.
- Developed and managed a portfolio of 50+ microservices and micro frontends.
- Managed deployment of microservices in Kubernetes using Helm charts, ensuring scalability and consistency across DEV, INT/STG, and PRD environments.
- Built robust and scalable APIs for different DCM clients to configure/ reconfigure settings and manage websocket connections with the backend.
- Conducted peer reviews, led technical discussions, and consistently delivered high-quality software features while presenting demos to stakeholders, ensuring alignment across cross-functional teams.
- Collaborated with 100+ engineers worldwide to design and build the APEX Console dashboard, incorporating features like billing, invoicing, user management, security, and observability.
- Led translation and localization efforts in over 11 languages to effectively serve a global customer base.
- Frequently rolled out new offers and managed configurations such as device health monitoring, customer alerts, and notifications.
- Actively contributed to the hiring and recruitment process.

### Intern
July 2020 - June 2021 (1 year)
Bengaluru East, Karnataka, India

---

## Education

### Thapar Institute of Engineering & Technology
Master of Technology, Computer Science · (August 2019 - June 2021)

### GITAM Deemed University
Bachelor of Technology, Computational Science · (2013 - 2017)
